

8th ESMRMB-GREC meeting **October 4th, 2023** **BASEL, Switzerland**

ESMRMB-GREC Meeting: Scientific Program

Date: October 4th 2023

Meeting venue: Congress Center Basel, Messeplatz 1 - 4058 Basel, Switzerland

Certification: Participants will receive a certificate of attendance

Enrolment: The meeting in presence is designed for scientists and consultants.

Local Organisation: Carlo C. Quattrocchi (IT)

After an extraordinary year of achievements, it is our pleasure to invite you to the 8th ESMRMB-GREC meeting, to be held in Basel, Switzerland, during the ESMRMB Pre-Congress day.

Introduction:

This meeting is designed as a unique context aimed at sharing ideas and data on MRI contrast agents research and possible gadolinium toxicity after the administration of gadolinium-based contrast agents (GBCAs). Joint international efforts will remain essential to optimize diagnostic efficacy and improve patient safety in MR imaging. Since 2016, the ESMRMB-GREC has adapted the contents of the discussion to current hot topics and has continuously improved its influence on the clinical and pre-clinical role of gadolinium-based contrast agents.

This 8th GREC meeting will cover topics related to the four missions of the group: 1. Clinical indications and safety of GBCA-enhanced MRI; 2. The chemical approach to improved MRI-contrast agents; 3. Alternative methods to GBCA-enhancement using artificial intelligence methods; 4. Emissions of GBCAs into the aquatic environment.

As a working group of experts with multidisciplinary background, we support the MR community with continuous education, information and scientific updates on the use and clinical applications of GBCAs.

Objectives:

- To share evidence-based state-of-the-art information on specific hot and emerging topics in GBCA-enhanced MR imaging
- To promote the dissemination of knowledge by means of papers to be published on behalf of the the ESMRMB-GREC working group
- To discuss on research activities and research funding opportunities

Wednesday, 04 October 2023

08:00-08.05	Welcome and practical meeting issues <i>Aart J. Nederveen, NL & Carlo C. Quattrocchi, IT</i>
08:05-08:30	2022-2023 ESMRMB-GREC achievements Candidates for the Chair position 2023-2026 <i>Carlo C. Quattrocchi, IT</i>
Mission 1 Session 1	<i>Clinical Indications and Safety of GBCA-enhanced MRI</i> <i>Moderator: Alex Rovira</i>
08:30-08:45	Gadolinium-based contrast agents in the diagnosis and monitoring of the ear and internal auditory canal. (Marinella Neri, IT; Andrea Falzone, IT)
08:45-09:00	GREC Discussion
09:00-09:15	Gadolinium use reduction strategies in the clinical setting: state-of-the-art – ESUR-CMSC joint initiative (Ilona A. Dekkers, NL)
09:15-09:30	ESUR-CMSC and ESMRMB-GREC Joint Working Group on GBCA Dose Reduction in MRI: Technical MRI optimisation (Aart J. Van der Molen, NL)
09:30-09:50	GREC Discussion
09:50-10:00	Multiorgan and plasma metabolomics for the investigation of the biological effects of gadodiamide and gadoteridol in healthy mice (Eliana Gianolio, IT)
10:00-10:10	Evaluating Gadolinium-Induced Histopathological Alterations Related to Small Fiber Neuropathy and Gadolinium Clearance Following Repeated GBCA Administration in Rats (Hubertus Pietsch, DE)
10:10-10:20	Investigation of the gadolinium distribution in human nerves by mass spectrometric imaging (Christine Verlemann, DE Astrid Jeibmann, DE and Uwe Karst, DE)
10:20-10:30	Disability and long-term clinical outcome in Patients with Multiple Sclerosis and evidence of gadolinium retention in the brain (Sirio Coccozza, IT)
10:30-10:40	Imaging of meningeal lymphatics with standard clinical MRI and intravenous GBCA administrations (Michael Stringer, UK)
10:40-10:50	MultiCriteria Decision Analysis (MCDA) model for GBCA (Anand Bherwani, USA; Francois Tranquart, FR)
10:50-11:15	Questions and remarks
11:15- 11:45	Coffee break
Mission 2	<i>The chemical Approach to Improved MRI-Contrast Agents</i> <i>Moderator: Eliana Gianolio, IT</i>

11:45-12:00 Seeking for Innovation with Magnetic Resonance Imaging Paramagnetic Contrast Agents: Relaxation Enhancement via Reversible, Weak, Electrostatic/Cation-p Interactions with Protonated Amino Groups or Endogenous Macromolecules (Lorenzo Palagi, IT)

12:00-12:10 GREC Discussion

12:10-12:20 The late phase clinical development program for gadoquatrane - a novel tetrameric GBCA (Petra Palkowitsch, DE)

12:20-12:30 Development and Evaluation of Magnetic Properties of a New Manganese (II)-dithiocarbamate complexes as MRI Contrast Agents (Alessandra Boschi, IT; Petra Martini, IT)

12:30-12:40 Evaluation of Iodinated contrast media as MRI-CEST contrast agents and comparison with Gadolinium (Dario Longo, IT)

12:40-13:00 High Relaxivity gadopiclenol for diagnostic MRI: the PICTURE and PROMISE phase III clinical trials (Jean-Sebastien Raynaud, FR)

13:00-13:30 Questions and remarks

13:30- 14:30 Lunch time and open discussion

Mission 3 *Alternative Methods to GBCA-enhancement (the AI approach)*

Moderator: Carlo A. Mallio, IT

14:30-14:45 Reduction of gadolinium with Artificial Intelligence: where do we stand and what is the potential (Katerina Deike-Hoffmann, DE)

14:45-15:00 GREC Discussion

15:00-15:15 Deep Learning for Post-Contrast T1-Weighted Brain MRI Synthesis (Ruben van Oosterhoudt, NL)

15:15-15:30 Interchangeability of Synthesized Low-Dose MR Images With Original Full-Dose Post-Contrast Images (Robert Haase, DE)

15:30-15:45 Increasing Contrast Agent Efficacy in MRI through Deep Learning trained on Synthetic Data (Alberto Fringuello Mingo, IT)

15:45-16:00 Questions and remarks

16:00- 16:15 Coffee break

Mission 4 *Emissions of GBCAs into the aquatic environment*

Moderator: Gerard Stroomberg, NL

16:15-16:30 Green Neuroradiology: a map of european initiatives to reduce gadolinium emissions in the environment (Alex Rovira, ES)

16:30-16:45 GREC Discussion

16:45-17:00 Teratogenic risk associated to gadolinium: updates on Hydra vulgaris regeneration assay (Carlo C. Quattrocchi, IT; Massimiliano Scalici, IT)

17:00-17:15	Elemental analysis of the uptake of gadolinium-based contrast agents and their analogues in plants and algae (Torben Maas, DE; Uwe Karst, DE)
17:15-17:30	Relationship between GBCA administration and wastewater anthropogenic gadolinium (Mihály Braun, HU)
17:30-17:40	Distribution of anthropogenic gadolinium in surface and ground waters of Poland (Irena Wysocka, PL)*
17:40-17:50	Biological effects of gadolinium in waste water: the importance of the context (Giovanni Libralato, IT)*

* recorded video presentation

17:50-18:00 Questions and remarks

Adjourn: Enjoy 2023 ESMRMB congress and see you next year in Barcelona on October 2-5 2024!

ESMRMB-GREC Chairs

Aart J. Nederveen, NL - a.j.nederveen@amsterdamumc.nl

Carlo C. Quattrocchi, IT - carlo.quattrocchi@unitn.it
